STOCKS AND BONDS

NEW YORK, Nov. 26.—New York stock market closed with a strong advance. The market opened firm at an advance of 1/8 to 1/4 points in response to the firmness of Liverpool over the local holiday, particularly in the market of spot, which were 24 English points higher on a larger volume of business. There was a good deal of trading around the opening figures here and here seemed to be some southern buying, selling but the offerings were readily absorbed on slight reactions and the advance was largely checked until late in the afternoon when some active demand from shorts and commission houses with March contracts selling up to 12 1/2 and May to 12 3/4 and with the active market showing net gains of above 4 1/2 to 50 points.

Some of the new crop deliveries were relatively firm in the later trading and showed the maximum gains at the close, owing to the strength of the present crop and continued talk of a scarcity of fertilizers. Smaller private crop estimates were factors in the advance. It being reported that one of the local statistical bureaus estimated the yield at only 11,000,000 bushels, excluding linters, while the government estimate placed it at 12,250,000, a Memphis authority at 11,250,000 bushels, excluding linters and an Alabama spot firm at 12,700,000 bales, excluding linters. The cables from Manchester representing an improved demand for goods from China helped the advance in connection with the firming of the silver market. London, which would tend to stimulate the eastern demand and there were numerous private reports from the south of a more active spot situation in the interior.
